

The mechanically operated "SOYEE" Shoe Cover Dispenser is the latest product in our range of innovative equipment. It is practical, economical and helps maintain a clean environment.

The dispenser solves the problem of changing shoes, or manually putting on shoe covers by hand before entering a clean facility or area. Just place your foot into the dispenser and a shoe cover will be automatically dispensed to cover the shoe or work boot.

When using the mechanically operated shoe cover dispenser, employees, clients, patients or visitors, are more relaxed as they no longer need to bend over to put on shoe covers by hand.

More importantly, the extra barrier of protection the shoe covers provide helps to control the spreading of dust, dirt and other contaminants into clean areas. The waterproof CPE shoe covers help keep flooring dry and dust free when worn before entering rooms or offices from wet or dusty areas.

The user-friendly dispenser is ideal for use within cleanroom dressing areas, computer rooms, laboratories, clinics, hospitals, factories, hotels, offices, construction sites and real estate open house days.

#### Features:

- No need for electricity or battery to operate, mechanically designed
- Convenience. The dispenser can be deployed easily since it doesn't require an electrical power connection
- Reliability. The successful rate is over 99% for the CPE shoe covers
- Easy to use. A bundle of shoe covers can be added easily by looking through the window panel of the dispenser.
- Safety. With this new design – the foot will not get stuck in the dispenser as the mechanical dispensers do not use infrared sensors as do the electrically operated dispensers
